Description
The SKY65709-81 is a front-end module (FEM) with an integrated low noise amplifier (LNA) and pre-filter designed for the BeiDou Satellite Navigation System/Global Positioning System/Global Navigation Satellite System (BDS/GPS/GNSS) receiver applications. The device provides high linearity, excellent gain, a high 1 dB input compression point (IP1dB), and a superior noise figure (NF).

The LNA is fabricated using advanced silicon technology. The pre-filter provides the low in-band insertion loss and excellent rejection of the cellular, PCS, and WLAN frequency bands. The SKY65709-81 uses surface-mount technology (SMT) in the form of a 1.7 x 2.3 mm Multi-Chip Module (MCM) package, which allows for a highly manufacturable and low-cost solution.

A functional block diagram is shown in Figure 1.
